

## **Healthcare Association of New York State (HANYS)**

HANYS, New York's only statewide hospital and continuing care association, represents more than 550 hospitals, nursing homes, home care agencies, and other health care organizations. HANYS' mission is to advance the health of individuals and communities by providing leadership, representation, and service to health providers and systems across the entire continuum of care. Student interns will work with HANYS' office of managed care on issues of contract negotiation, dispute resolution and litigation with health plans, as well as legislative and regulatory initiatives with state and federal government.
